

# NITROGEN PUMP TRUCK

## technical specifications

Equipment Weights		Dimensions & Flow Capacity	
Gross Weight	58,700 lbs	10'6" x 41' x 8'	
Empty Weight	39,000 lbs	Maximum Flow Rate	3,000 SCFM
		Minimum Flow Rate	100 SCFM
		Temperature Range	40° - 180°F

Nitrogen Specialty is keeping up with the pace of business, providing mobile nitrogen applications for the oil, gas, pipeline, shipping, petrochemical and refinery industries.

Our Mobile Unit can hold 3,000 gallons of liquid nitrogen, providing 10,000 PSI working pressure, up to 180,000 SCF per hour and flameless heat recovery with exchanges from

hydraulics, exhaust and transmission. That's power we can bring right to your worksite.

With more than 210 years of combined employee experience, a full range of nitrogen applications and the ability to bring our system where you need it most, you just can't go wrong with Nitrogen Specialty.
